DISINFECTION, SANITISING
& STERILISING SOLUTIONS

AQUAZONE L-1000 AND L-500

The AQUAZONE L-1000 and L-500 ozone generators are a
multipurpose, water and air sterilizer and purifier.

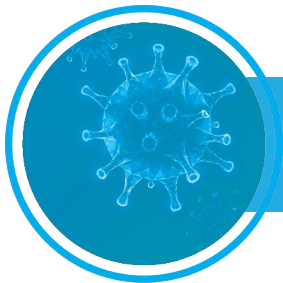

Product image or enclosure colour may vary

APPLICATIONS

The Aquazone L-1000 and L-500 ozone generators can be used to pump ozone gas for sanitisation, disinfection and deodorising in areas such as;

- Fresh tasting disinfected drinking water
- Rinsing fresh vegetables or fruit to extend shelf life
- Killing surface bacteria on fresh food such as meat, chicken and prawns
- Oxidising residual pesticides on the surface of fresh fruit and vegetables
- A cupboard to kill mould and deodorise vehicle or room to remove smoke and other odours
- A fridge or freezer to sanitise and remove residual odours
- Sanitise and deodorise smelly shoes and gym bags
- Bathroom and kitchen cupboards
- Sanitise children's toys and toy boxes
- Washing wounds as a salve
- Treating skin ailments such as eczema
- Sanitise brushes, toothbrushes, nappy / diaper bins
- Ozone therapy tent / sauna
