

AQUAZONE OZONE RINSE SYSTEM 5G/HR

The Aquazone Ozone Rinse System is a plug and play portable device, designed for quick deployment, improving your work efficiency. The system produces instant ozone water as soon as it is connected to a water supply.

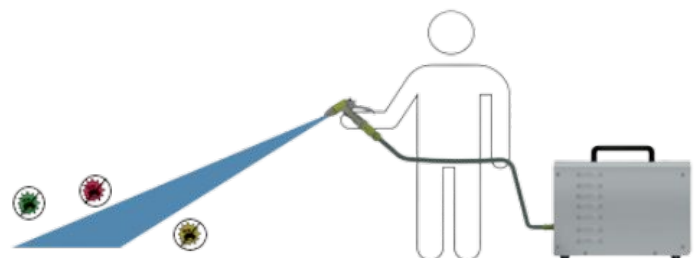

Product image may vary

APPLICATIONS

- Ozone water helps remove oil and grease
- Eliminate boiling water disinfection
- Improve efficiency
- Reduce chemical costs
- Low maintenance
- Reduced maintenance costs
- Removes odour

AQUAZONE RINSE SYSTEM 5G/HR

SPECIFICATIONS

Model	Aquazone Rinse System 5G/hr
Voltage Hz	220V/50hz
Power Watts	0.3kw
Outlet water pressure	1.5-2.5
Ozone water volume	600L/Hr
Ozone concentration	1-3 ppm
Enclosure size	37cm x 25cm x 30 cm
Enclosure material	304 Stainless Steel
Weight kgs	12.6kg
Ambient temperature	2°C~40°C.
Ambient humidity	≤75%.

FEATURES

- Stable production of high concentration ozone water, up to 1-3 mg/l.
- LCD screen monitoring water flow rate, temperature, water consumption, working time.
- 304 Stainless steel housing, easy to clean, corrosion resistant, durable.
- Low energy consumption, continuous operation and long service life.
- Integrated water flow sensor, automatic shut off if no water flow.
- Automatic pressure compensation control.
- Compact and small design, low noise and easy operation.

Easy disinfection and cleaning

Handle

Air vent

Digital screen

Cooling fan

Stainless steel body

Tap water / ozone water interface
