INSIDE THIS ISSUE

- **Biozone's bottled water solutions.**
- **Water recycling benefits.**
- **The Aquazone Home Ozone Generator**
- **The Airzone Odofree Sanitizer**
- **Ozone's Role in Aquariums.**

Reap the rewards of Biozone's bottled water solutions.

Whether you're running a small plant with a 200-litre bubble tanks or a large industrial auto-fill and bottle plant, we've got you covered.

Biozone Manufacturing, our expertise in water purification allows us to offer unique and tailor-made solutions that meet your site-specific requirements with full technical support. We ensure that your systems conform to the National Drinking Water and Bottling standards by analysing the quality of your source water and designing a custom-made system that offers efficiency as opposed to an 'off the shelf' solution. Our ozone rinse systems are designed to disinfect the bottle and caps before filling and deliver ozone water at 0.04 ppm for residual protection in the bottle during delivery and storage.

We are able to offer full technical support starting at the source, right through to your finished product.

Our dedicated service team offers site visits, reports, and services for your plant, and our team can group outlets to mitigate any additional mileage and labour costs. Keeping your costs low and your profits flowing.

If you are an owner of a bottled water shop looking for reliable and cost-effective solutions, contact our water experts today. We can offer you the best recommendations to meet your specific needs.

Save more money by utilising every natural resource at your disposal.

Water recycling is the process of reusing treated wastewater for numerous applications, including agricultural irrigation, refilling groundwater basins, toilet usage and various industrial purposes. This offers great financial benefits and resource savings. Most recycled water comes from treated municipal wastewater or sewage, and domestic water. Recycling wastewater can strengthen local water supplies, increase water quality, save energy and reduce wastewater discharge and disposal costs.

For guidance on how to start your water recycling process visit our site or contact our team sales@biozone.co.za

Ozone technology available at your finger tips!

The Airzone Odofree Sanitiser

The Airzone Odofree Air sanitiser and Freshener can be used for numerous applications like;

- Neutralising and removing micro-organisms in the air and on surfaces
- Discourages dust mites and cockroaches
- Prevents the growth of mould
- Maintains fresh clean air
- Removes smoke odours in the room or from clothing, furnishings and carpets
- Reduces and removes toxic gases

The Aquazone Home Ozone Generator

The Aquazone Home Ozone Generator can be used to pump ozone gas for sanitisation, disinfection

and deodorising in areas such as;

- Fresh-tasting disinfected drinking water
- Rinsing fresh produce to extend shelf life
- Killing surface bacteria on fresh food
- Oxidising residual pesticides
- Eliminating mould
- Deodorising to remove odours
- Treating skin ailments such as eczema
- And much more!

Order one via email sales@biozone.co.za

Ozone systems support Ushaka Marine World's life since 2005.

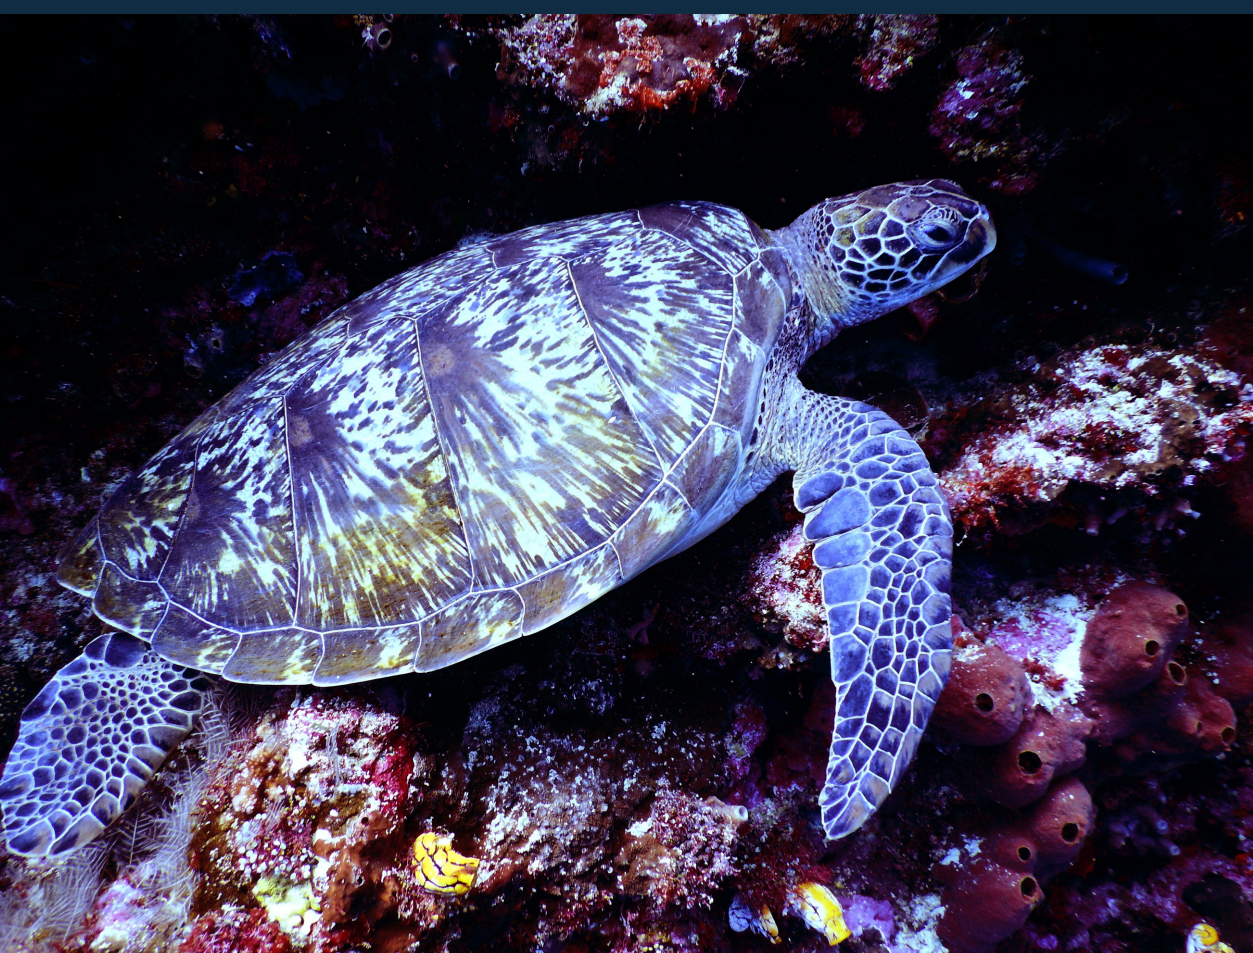

Ozone is essential in aquariums or fish farms (aquaponics) as oxygen-fed ozone combined with efficient protein skimmers and dosed continuously can maintain fresh crystal clear water in which fish, other aquatic life and underwater plants can thrive.

None more so than at uShaka Marine World in KwaZulu Natal where ozone systems supplied by Biozone Manufacturing have been providing "Life support" assistance since 2005.

Continuous operation with oxygen-fed ozone systems controlled by ORP (oxygen redox potential) monitors and controllers maintains a healthy living environment for the aquarium world.

Biozone people highlights

We are delighted to have Wesley Van Der Giessen as our new General Manager.

With his passion and technical expertise, Wesley brings a wealth of experience in overseeing water purification project planning, implementation, and tracking.

A Vision for Success

Wesley Van Der Giessen has outlined several key objectives that will drive Biozone Manufacturing forward:

Innovative Water Purification Solutions

Wesley aims to revolutionize the industry by creating a unique approach to water purification through environmentally safe methods and tailor-made engineered solutions. By pushing the boundaries of technology, we will provide efficient and sustainable solutions for our clients.

Building on a Legacy

Biozone Manufacturing boasts an impressive 25-year track record of success. Wesley is committed to growing and expanding upon this foundation, ensuring that we continue to deliver exceptional products and services that meet the evolving needs of our customers.

Pioneering Water, Air, and Waste Purification

As industry pioneers, we strive to be at the forefront of water, air, and waste purification. Wesley's goal is to secure Biozone's position as the leading provider of comprehensive purification solutions in Southern Africa, setting new standards for quality and reliability.

Leaders in Ozone Technology

Biozone Manufacturing has long been recognized as a leader in Ozone technology in Southern Africa. Wesley is dedicated to maintaining and strengthening our position as the go-to experts in this field, driving advancements and ensuring our clients have access to cutting-edge ozone solutions.

Research and Development for Future Challenges

South Africa faces unique challenges in the realm of water purification. Wesley believes in the power of constant research and development to tackle these challenges head-on. By staying at the forefront of innovation, we will develop solutions that are not only relevant but also in high demand in today's ever-changing landscape.

Preferred Supplier to the Industry

Wesley's vision for Biozone Manufacturing includes positioning our company as the preferred supplier to the water purification industry in South Africa. From domestic to retail, commercial to industrial applications, we aim to be the trusted partner for all purification needs.

A Culture of Appreciation

At Biozone Manufacturing, Wesley values the team and recognizes their contributions as the driving force behind our success. He understands the importance of maintaining a happy and positive work environment for our staff and the Biozone family. Without their skills, input, and dedication, our business would not be possible. We are confident in Wesley's leadership abilities and eagerly anticipate his future plans for Biozone.

As we embark on this exciting journey under Wesley's guidance, we invite you to stay connected with us through our monthly newsletters. Together, we will continue to innovate, excel, and make a meaningful impact in the field of water purification.

Thank you for being a valued member of the Biozone Manufacturing community!
