

OZONENEWS

Biozone's New Premises and Exciting New Opportunities

We are thrilled to announce that, as of February 2025, Biozone Manufacturing will be operating from our new premises!

This marks a significant milestone in our journey, and we couldn't be more excited to kick off the year from a space designed to accommodate our growth and enhance our services.

Unit 2 Northlands Production Park, Epsom Avenue, Hoogland, Randburg 2169

This move allows us to better serve our clients, streamline our operations, and continue delivering industry-leading air and water treatment solutions. Thank you for your continued trust and partnership—here's to a successful and innovative year ahead!

New Service Offering : Alkaline Water Production for Bottled Water Businesses

At Biozone Manufacturing, we are always looking for ways to support the growth of our clients. That's why we're excited to announce a new service offering for bottled water businesses: the opportunity to produce alkaline water for your customers!

Alkaline water is increasingly popular due to its health benefits, making it a highly sought-after product in the beverage industry. With our advanced water treatment technology, we can help your business offer high-quality alkaline water, allowing you to tap into a growing market and meet the needs of health-conscious consumers.

WHAT IS ALKALINE WATER?

Alkaline water is water with a higher pH level than regular drinking water, which is believed to help neutralize acid in the body. This can provide numerous health benefits, including:

- **Improved Hydration:** Alkaline water is said to be more easily absorbed by the body, enhancing hydration.
- **Antioxidant Properties:** It may help protect cells from oxidative stress, which is linked to aging and disease.
- **Better Bone Health:** Some studies suggest that alkaline water can reduce bone loss over time.
- **Supports Digestion:** With its pH-balancing properties, alkaline water may help ease acid reflux and support better digestive health.

How Biozone Can Help You Offer Alkaline Water

With our state-of-the-art water purification and remineralization systems, Biozone Manufacturing can assist you in producing alkaline water that meets the highest standards of quality and safety.

Our systems ensure that the water you bottle is not only alkaline but also free from impurities, providing your customers with pure, health-boosting hydration.

This service is a great opportunity for your business to:

- **Expand Your Product Range:** Offer a premium product that appeals to health-conscious consumers.
- **Increase Profit Margins:** Alkaline water is in high demand, allowing you to attract new customers and offer a high-value product.
- **Enhance Your Brand:** Position your bottled water brand as a leader in health and wellness by adding alkaline water to your lineup.

Stay Ahead in 2025 – Discover Emerging Trends in Water and Wastewater Treatment

It's essential to stay informed about the latest advancements in water and wastewater treatment technologies. At Biozone Manufacturing, we continuously innovate and adapt to meet the evolving needs of our clients across industries like agriculture, beverage, environmental, and more. In this edition, we're highlighting the key trends shaping the water treatment landscape for 2025.

Water treatment technologies are evolving rapidly, driven by increasing regulatory demands, environmental sustainability goals, and advancements in digital solutions. Here are the key trends you should know.

Digital Water Solutions

Smart water management is transforming how industries and utilities operate. By integrating sensors, IoT, and AI, businesses can now monitor water systems in real time, optimizing treatment processes and ensuring efficiency.

Decentralized Water Treatment

Modular, on-site water treatment systems are gaining popularity, especially in remote or off-grid areas. Our containerized systems, like our 12 Kilolitre Nanofiltration Purification System, provide localized, scalable solutions.

Nanotechnology for Precision Filtration

Biozone's nanofiltration systems provide precise and effective filtration, targeting contaminants that traditional systems cannot address, such as heavy metals, bacteria, and viruses. Our solutions are ideal for industries requiring ultra-pure water, such as pharmaceuticals and food and beverage production.

Let our nanofiltration experts help you find the right system for your application.
