

SPOTLIGHT ON BIOZONE'S LATEST COLLABORATIONS AND INNOVATIONS

Welcome to another edition of Ozonews where we share some exciting developments happening behind the scenes at Biozone Manufacturing.

GLOBAL PARTNERSHIP WITH COMARK

Our General Manager, Wesley Van Der Giessen, and Operations Manager, Joash Rambaran, recently visited China to meet with potential partners Comark, a professional beverage machine manufacturer. We are pleased to announce that the visit was a resounding success, and Biozone Manufacturing is now the preferred distributor of Comark's bottling lines for Southern Africa.

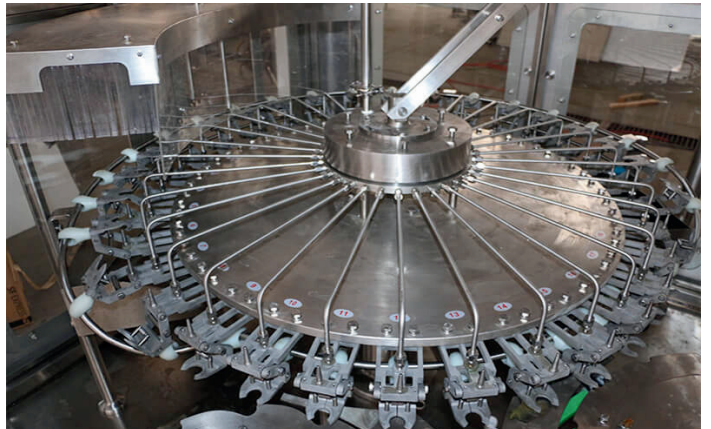

UPCOMING BOTTLING LINE PROJECT : ALLUVION WATER

Following the successful trip to China, Biozone Manufacturing has commenced a new bottling line project for a newly established client, Alluvion Water.

Biozone will be installing a **Pure Water Production Line** at their facilities, marking the beginning of a promising collaboration.

UPCOMING SEWAGE WASTE TREATMENT PROJECT: EASTPLATS MINE

Biozone Manufacturing is on the brink of completing an innovative sewage waste treatment plant for our client, Eastplats Mine. This project features a containerized unit designed to be a stand-alone system, ideal for processing sewage and waste treatment in areas lacking municipal sewage infrastructure.

KEY BENEFITS INCLUDE:

- **Stand-Alone Capability:** Perfect for industries like mining, where traditional systems are not feasible.
- **Natural Bio Processes:** Utilises natural processes, reducing operational costs and environmental impact by eliminating the need for harsh chemicals.
- **Return on Investment:** Offers a quick return on investment compared to conventional sewage disposal methods, making it a cost-effective solution for remote or rural areas and mines.

We are looking forward to being your innovation partner in Harnessing Nature's Technology - Our team is on standby to assist!
